

## Wisconsin Installment Loan Fee Schedule

The charts below are examples of the principal and finance charges of a Wisconsin installment loan with Cash Factory USA. The number of days between your funding date and your first payment due date depends on the funding date for your loan and the dates and frequency you receive your income. For borrowers with weekly and bi-weekly pay periods, your payments will be due approximately every two (2) weeks until your loan reaches its maturity date. For borrowers with monthly and semi-monthly pay periods, your payment will be due approximately every thirty (30) days after your first payment is due until your loan reaches its maturity date. Please note, the amount and number of payments will also vary based on the loan amount, the number of payments, and the term of the loan. The actual finance charge and APR of your loan will be disclosed in the federal Truth-In-Lending Statement contained in your loan agreement.
